“我演讲的主要议题是“医疗器械的设计与发展”，我们关注新的医疗解决方案，同时与医生，律师，投资商和大企业一同来完成设计方案。中国的医疗市场，令我吃惊。它面对与全球市场同样的问题，如何提供上亿人的高质量产品，同时经济上人们又能负担得起。唯一解决之道就是医疗创新。因为，我们不能按照原来的老路走，人们无法负担得起。我们这里看到了非常多的创新科技，创造力，和有趣的想法。2年之前我曾参与过创新论坛，但今年活动的规模大大升级，远超2年之前。展会和论坛留下了很多太棒的体验，我会推荐我的很多同事一同来参加。

My topic is about "The Design & Development of healthcare solutions". We care about designing new solutions, so we bring together doctors, lawyers, investors and big companies in order to successfully create new healthcare solutions.

China is an exciting place for healthcare. It's facing the same challenge that the world is facing.

How do you provide quality care to billions of people without compromising quality, but not bankrupting your finances? The only solution is innovation. We cannot continue to do the things the way we've did in the past, because we bankrupt the system. So innovation is the centre. ”
