SQ. MTS. AREA

**2,00,000+**  
VISITORS

**2,000+**  
EXHIBITORS

## PLASTICS RULE THE WORLD

Plastics are one of the most extensively used manufacturing materials across the globe, thanks to its widespread use in the Automobile, Healthcare, and other day-to-day consumption sectors. Their use has contributed largely to the preservation of natural resources of the Earth which has further prevented their depletion. Furthermore, this material has increased the durability, affordability, and shelf-life of the products significantly. This has led it to become a preferred material among the global consumers.

This is further established by the fact that India, one of the fastest growing economies of the world, consumed 18.4 MMT of Plastics in the year 2018. With the increasing fruitful applications of plastics, this number will grow exponentially in the upcoming years. Promoting this thought, Plastindia Foundation is hosting the third largest International Plastics Exhibition of the world in the year 2021.

## THE OVERALL SCENARIO OF THE PLASTICS INDUSTRY

The global plastics industry is growing at an unprecedented speed. Since the production of plastics that began in the year 1940, it has grown multiple folds and has created a lasting impact in various sectors. This is justified by the fact that this industry is now worth of approximately USD 1.3 trillion at a global level. Moreover, it promises to triple by 2050. According to Grand view Research, the global electronics and consumer good plastics market is expected to reach USD 53.5 billion by 2025.

Thus, the Plastics Industry is a flourishing industry. When appropriate steps are taken, these steps can translate into highly profitable business opportunities.

## PLASTINDIA EXHIBITIONS :

## INTEGRATING THE PLASTICS INDUSTRY WITH PLEOTHRA OF OPPORTUNITIES

Integrating this on a single platform, **PLASTINDIA** is a gateway to explore and grab such opportunities and uplift the industry to new heights.

Since its first edition in the year 1990 which hosted **528 exhibitors** to the last edition of the year 2018 that hosted **1800 exhibitors**, **PLASTINDIA** has grown immensely. The next edition is scheduled to be held in **2021**.
