- Organized in the financial capital of India.

OVERVIEW

The global wire and cable industry in India is highly fragmented with the presence of a number of small and medium enterprises. The industry is at its growing stage in the country and is expected to capture a significant share in the electrical equipment industry in the coming years. The new technologies and extensive research and development by market players are making it possible to collect more information in order to fully understand the demand of the market

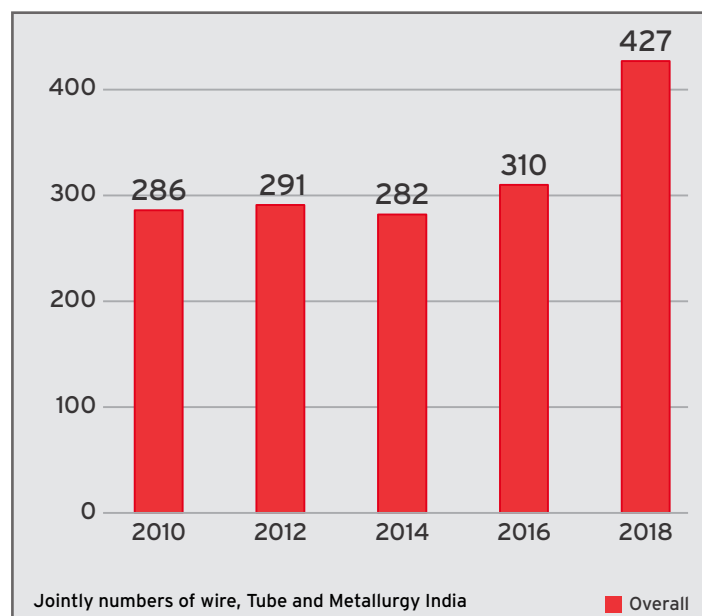

INDUSTRY SCENARIO

The wire and cable market is expected to grow at a CAGR of 10.3% in India, predominantly on account of growing government investments towards infrastructure development projects.
